Experiment 17: Write a Prolog Program for a DB with Name and DOB

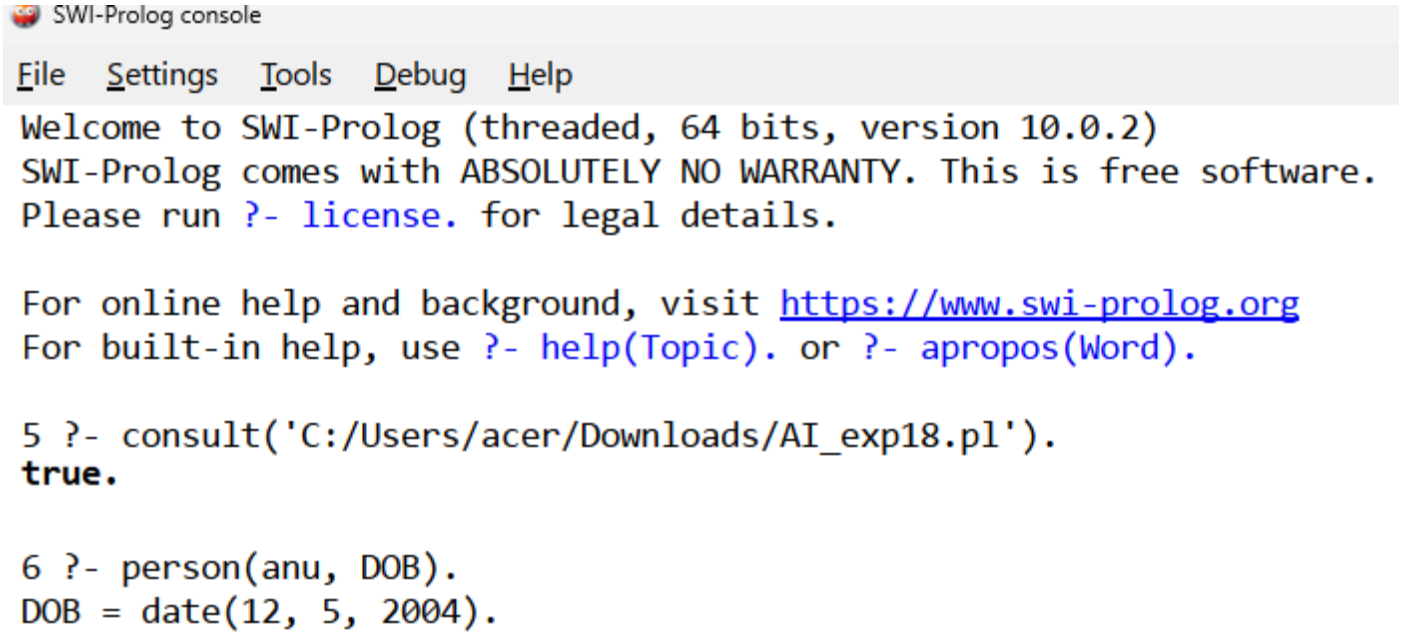

Aim: To create a Prolog database containing names and dates of birth and retrieve details using queries.

Procedure:

1. Open a text editor and write the Prolog program.
2. Define facts containing names and dates of birth.
3. Store the details using a suitable predicate.
4. Write a query to retrieve a person's date of birth.
5. Load the program into SWI-Prolog.
6. Execute the query and display the result.

Output:

Result: Thus, a Prolog database containing names and dates of birth was created successfully.
