Experiment 19: Write a Prolog Program for STUDENT-TEACHER-SUB-CODE.

Aim: To create a Prolog database representing student, teacher, and subject-code relationships and retrieve details using queries.

Procedure:

1. Open Notepad and write the Prolog program.
2. Define facts for students and their subject codes.
3. Define facts for teachers and their subject codes.
4. Create a rule connecting students, teachers, and subjects.
5. Save and load the program into SWI-Prolog.
6. Execute the query and display the result.

File Edit View

```
student(anu, cs101).
student(raju, cs102).
student(priya, cs101).

teacher(ravi, cs101).
teacher(meena, cs102).

student_teacher_subject(Student, Teacher, Code) :-
    student(Student, Code),
    teacher(Teacher, Code).
```

Output:

Result: Thus, a Prolog program for student, teacher, and subject-code relationships was implemented successfully.
